1957 APPLIED HYDRAULICS Editorial Index

ACCUMULATOR CIRCUITS

Accumulator Test Procedure . . . to Evalute Reliability Sept. p 114

Cylinder Synchronization . . . Using Accumulators for Position Detection By Robert E. Raymond Sept. p 88

Determining Pump and Accumulator Size for Electro-Hydraulic Servomechanisms By Paul E. Straight Apr. p 74

Selecting Accumulators for Minimum Maintenance By J. Russell Hemeon Nov. p 78

ASSOCIATION AND TECHNICAL MEETINGS

ASTM Symposium Jan. p 229

Fabricating Machinery Forum July p 65

JIC Meets to Discuss Electrical Standards June p 130

National Conference on Industrial Hydraulics Oct. p 98

Report on Turbojet Hydraulic Symposium June p 119

SAE Aircraft Meetings Feb. p 96 June p 112

Summaries of Technical Papers given at 13th NCIH Oct. p 102

AVIATION

Aircraft Hose Development for High Pressure and Temperatures By Irving D. Press Nov. p 132

Aircraft Hose . . . Cure Date and Age Control Sept. p 150

Airline Hydraulic Maintenance Jan. p 222

Breaking the Thermal Barrier . . . Report of Turbojet Symposium June p 117

Ceramic Reinforced Material for 500 F Backup Rings Oct. p 139

Control of Contaminants from Aircraft Ground Service Compressors By Emil Struharik May p 162

Converting a Transport Requires Hydraulic Changes June p 120

Cylinder Material . . . Steel or Aluminum? By P. Person Dec. p 111

Design of Test Equipment for High Temperature Operation By L. H. Smith Apr. p 118

Designating Flow Restrictors By D. M. Bruce and K. G. Hancock Feb. p 88

Designing Servo Actuators for 700 to 1000 F. By G. R. Keller Nov. p 128

Evaluating Aircraft Hydraulic Filters By George R. Keller Mar. p 127

Fluid Power at Farnborough By John A. Lankester Dec. p 117

High-Pressure Compressors . . . Using Bladder-Type Accumulators By Larry Winston Sept. p 143

Highlights of SAE Aircraft Meetings Feb. p 96 June p 112

How Martin Cut Hose Test Costs By F. Ecker Mar. p 134

Hydraulic Drive and Control Help Test Aircraft Fuel Tanks. July p 111

Miniature Hydraulic Power Supply . . . for Airborne Applications By Richard Whitcomb and Theodore Mapes Aug. p 110

O-Rings . . . . Cure Date and Age Control By Tommy McCuistion and E M. Schaub Apr. p 114

Pneumatic Diaphragm Valves Control Cooling Air Temperature By Clinton G. Miller Dec. p 120

Reducing Static Reaction . . . in Spool-Type Valves By R. I. Sinclair and D. E. Turnbull Aug. p 106

Selection of Flareless Fittings for Aircraft Circuits By Kenneth Clarke May p 158

Series Synchronizing Circuit to Extend a Rocket Launching Beam By E. Ashley July p 106

Static Sealing with Metal O-Rings for High Temperature and Pressures May p 166

Vertijet Uses Hydraulically Actuated Landing Field By Scholer Bangs Oct. p 133

CIRCUIT DESIGN

Adding 6000 psi Drive By W. R. Matthews Aug. p 90

Air & Oil Circuit Guide Jan. p 181

Built-in Simplicity and Protection with 2000 psi Control Valves By Ryan Backofen Feb. p 81

Chart the Duty Cycle to Determine Power Requirements By Harold A. Yarnell June p 90

Control of Spindle Speed and Tool Feed By Harvey Prill Feb. p 63

Counterbalancing Circuit for an Overhung Milling Cutter By Brad Bartlett and Ernest I. Kaiser Aug. p 87

Cylinder Synchronization . . . Using Accumulators for Position Detection By Robert E. Raymond Sept. p 88

Decelerating an Index Table without Shock By T. J. Becker June p 69

Efficient Fluid Motor Control for Positive and Negative Work Loads By John R. Fawcett Mar. p 102

Electrical Pressure Control By Ransom Tyler Mar. p 113

Engineers Discuss Air and Oil Design at National Acme Company Nov. p 146

Fluid Motors Drive Cutters . . . on a Weed Mower Sept. p 119

Fluid Motors Synchronize Cylinders with Unequal Loading By John Perkon July p 102

Giant Oil-Driven Shutters Control Thermal Neutron Radiation By Robert P. Stoddart June p 96

How Fluid Motors Are Used on a Thread Miller By L. F. Chaffee Feb. p 73

Hydraulic Cylinders Provide Rotary Motions on a Pipe Handling Table By Laverne E. Erickson July p 96

Hydraulic Transmission Maintains Right Head on Beer Aug. p 98

Hydraulics Hoists Texas Towers By Leroy Nixon and G. R. Pittman Sept. p 105

Low Pressure Hydraulic Elevator to Lift 75,000 Pounds By J. B. Harrison Mar. p 88

Practical Design Ideas Lead to Minimum Leakage By J. R. Hemeon May p 83

Push Button Control—Part 2 By Kenneth B. Rexford Feb. p 77

Relays and Contactors—Part 2 By Kenneth B. Rexford Apr. p 97

Rotary Index with Cylinders By H. Cutler Nov. p 96

Safety with Manual Controls By Paul McCreary and Kenneth Bandy Mar. p 76

Reprints of this 1957 APPLIED HYDRAULICS editorial index are available. Copies will be sent without charge. Address your request to Editor, APPLIED HYDRAULICS, 612 Huron Rd., Cleveland 15, Ohio.

Shop Built Form Tooling Uses Clever Electrical Control
By William MacLeod and W. C. Nuckles Mar. p 86

Smooth Motions with Rotary Actuators
By Dan Borodin and Rex C. Burnham Oct. p 124

Successful Low Temperature Operation of Hydraulic Systems
By Keith A. Carlson Nov. p 69

Synchronize 4 Cylinders with Unequal Loading
By James Tankard Apr. p 65

Synchronizing Cylinder Reciprocation with Shaft Rotation
By Addison T. Smith Nov. p 108

Temperature Control in Hydraulic Systems
By Allen E. Morris Aug. p 69

Triple Circuit for Wide Speed-Force Variation
By Stanley Bjorklund Nov. p 73

What They Say About Leakage Control May p 81

COMPONENT DESIGN

Check Valves . . . Design and Application
By D. Van Deerlin Apr. p 71

Design of an Air Cylinder for Impact Operation
By E. Holdsworth Mar. p 104

Designing Servo Actuators for 700 to 1000 F
By G. R. Keller Nov. p 128

Feed Control Panels for Machine Tool Slides
By Maurice Beshouri Oct. p 88

Flow Control Valves and Feed Circuits
By Peter Coffaro Sept. p 99

How to Design and Use Magnetic Plug Assemblies in Hydraulic Reservoirs
By J. Russell Hemeon Mar. p 73

Manual Control of Compound Cylinder Regulates Speed and Force
By O. G. Beardsley Nov. p 84

Miniature Hydraulic Power Supply
By Richard Whitcomb and Theodore Mapes Aug. p 110

Modified Relief Valve Solves Automatic Positioning Problem
By E. D. Porter Nov. p 123

Modified Valve Spools to Control and Eliminate Cylinder Drift
By John J. Pippenger June p 65

Modified Valve and Cylinders Permit Use of Hydraulics to Bind Books
By Jack Bendror Oct. p 82

Preselector Mechanism Control Four Valve Spools June p 80

Quick Guides to Product Selection Jan. p 87

Reducing Static Reaction . . . in Spool-Type Valves
By R. L. Sinclair and D. E. Turnbill Aug. p 106

Relays and Contactors
By Allan E. Morris Mar. p 79

Rotary Air Motors . . . their Selection and Application
By Keith A. Carlson Sept. p 83

Simple Hydraulic Cushion . . . Safely Stops Grinder Table
By Joseph L. Poggie Sept. p 108

Temperature Control in Hydraulic Systems
By Allan E. Morris Aug. p 69

Understanding Spool Valves
By Robert Spurr Nov. p 106

HYDRAULIC FLUIDS

ASTM Symposium on Fluids Jan. p 229

Effect of Sludge on Hydraulic Oil
By B. M. Dunham Feb. p 61

Fire-Resistant Hydraulic Fluids
Part 1—Emulsion Types
By A. S. Morrow, H. E. Sipple, R. T Holmes Apr. p 78

Part 2—Aqueous Base Types
By W. H. Millett June p 124

Part 3—Phosphate Ester Base Types
By F. H. Langenfeld Aug. p 114

Part 4—Pure Phosphate Ester
By W. D. Matthews Sept. p 168

Part 5—Change-Over Practice
By Charles R. Schmitt Oct. p 160

Part 6—Safety and Use Factors
By Lawrence Jackson Nov. p 116

Successful Low Temperature Operation of Hydraulic Systems
By Keith A. Carlson Nov. p 69

Temperature Control . . . in Hydraulic Systems
By Allan E. Morris Aug. p 69

MACHINE TOOLS

Air Cushions Rotary Actuator
By R. C. Rowe and J. C. Dale Aug. p 94

Control of Spindle Speed and Tool Feed
By Harvey Prill Feb. p 63

Counterbalancing Circuit . . . for an Overhung Milling Cutter
By Brad Bartlett and Ernest L. Kaiser Aug. p 87

Critical Thread Rolling Feed Rate . . . Accurately Controlled by Hydraulics
By Ralph R. Holt Sept. p 121

Decelerating an Index without Shock
By T. J. Becket June p 69

Feed Control Panel for Machine Tool Slides
By Maurice Beshouri Oct. p 88

How Fluid Motors Are Used on a Thread Miller
By L. F. Chaffee Feb. p 73

Machine Tool Tracer Control Made from Standard Four-Way Valves
By Paul B. Walton and William F. Morgan Apr. p 108

Preselector Mechanism Controls Four Valve Spools June p 80

Rotary Index with Cylinders
By H. Cutler Nov. p 96

Servo Valve Control for Tracing on a Spar Mill
By Alexander D. Roubloff Nov. p 87

Synchronize 4 Cylinders with Unequal Loading
By James Tankard Apr. p 65

Triple Circuit for Wide Speed-Force Variation
By Stanley Bjorklund Nov. p 73

MAINTENANCE METHODS

Airline Hydraulic Maintenance Jan. p 222

Change-over Practice for Fire Resistant Fluids
By Charles R. Schmitt Oct. p 160

How to Design and Use Magnetic Plug Assemblies in Hydraulic Reservoirs
By J. Russell Hemeon Mar. p 73

How to Install a Packing on Air and Oil-Powered Equipment May p 104

Hydraulics Training
By R. D. Reeve Aug. p 100

MOBILE EQUIPMENT

Built-in Simplicity and Protection with 2000 psi Control Valves
By Ryan Backofen Feb. p 81

Cylinder and Gear "Team" Increase Grader Efficiency Feb. p 68

Fluid Motors Drive Cutters Sept. p 119

Fluid Power Components for Mobile Equipment Dec. p 65

4—Plunger Valve Circuit Controls Crawler Shovel Apr. p 106

High Pressure Hydraulics Serves the Lumber Industry
By Heinz Nowak Mar. p 95

How Hydraulics Measures Tractor Pull
By John A. Lankester June p 88

How to Select a Fluid Power Package for Mobile Equipment
By Rodger Lovrenich Apr. p 89

Hydraulic Drive and Level Wind for a Mobile Winch
By Robert J. Schrader and Joseph F. Weinum June p 109

Hydraulic Energy Absorption Improves Shock Absorbers
By John A. Lankester Apr. p 110

Motorcycle and Truck Test . . . Introduced in Europe Aug. p 123

Oil Power for Off-Shore Well Drilling
By Robert O. Frederick Feb p 70

Trouble-Shooting Mobile Equipment Hydraulics with a Portable Circuit Analyzer
By John S. Schroeder Oct. p 121

Why Not Hydrostatics for Automobile Transmissions
By Ian McNeil Mar. p 83

PACKINGS

Ceramic Reinforced Material for 500 F Backup Rings Oct. p 139

Designing a Seal for Very High Pressure
By Jan M. Garvin May p 141

How O-Rings Seal Air and Oil Components
By E. J. Parker May p 121

How Teflon Packings Behave Where Temperatures Vary
By Howard Asp May p 127

How to Design for O-Rings on Air and Oil Powered Equipment
By E. J. Parker June p 84

How to Install a Packing on Air and Oil Powered Equipment May p 104

Pressure Drop Across a Packing Tells the Sealing Story
By Edward M. May May p 110

Prevent O-Rings Failure by Proper Compound Selection
By E. J. Parker Oct. p 152

O-Rings . . . Cure Date and Age Control
By Tommy McCuistion and E. M. Schaub Apr. p 166

Static Sealing with Metal O-rings May p 166

Temperature Control in Hydraulic Systems
By Allan E. Morris Aug. p 69

Testing Packings on a Plant-Built Machine May p 86

PNEUMATICS

Air and Oil Circuit Guide Jan. p 181

Air Booster Pump Gives Small High Force Package Mar. p 124

Control of Contaminants from Aircraft Ground Service Compressors
By Emil Struharik May p 162

Air Controls Oil Circuit on a 2000 ton Press
By S. H. Durbin July p 67

Air Cushions Oil-Fed Tubes on Seam Welding Machines
By Ora L. Sams Apr. p 102

Air Cushions Rotary Actuator . . . for 180 degree Index
By R C. Rowe and J. C. Dale Aug. p 94

Air Cylinders Improve a Traditional Textile Machine
By A. C. Flint June p 100

Air Cylinder Positioned Reamer Improves Concrete Pipe Production Oct. p 116

Air Operates Transfer Machine
By R. C. Rongone Feb. p 66

Air Power Improves Bottling Operation
By John A. Lankester Mar. p 91

Air-Powered Tooling . . . for a Drill Press Sept. p 136

3 Air Regulators Serve Separate Cylinders on Milling Machine
By S. H. White June p 78

An All-Air Press Safety Circuit Allows Flexible Cycles and Setups July p 80

Check Your Compressed Air Circuits
By Frank Ledwitz Nov. p 103

Compressed Air to Feed Screws Automatically June p 75

Design of an Air Cylinder for Impact Operation
By E. Holdsworth Mar. p 104

Economical, Efficient Closing and Sealing with Air Mar. p 110

Four Regulated Air Pressures Nov. p 94

Low Cost Air Circuitry Speeds Wood-Working Operations
By Norman Hope and Andrew Damer June p 104

Pneumatic Cylinders Clamp Parts for Brazing Nov. p 92

Pneumatic Detent Controls Expander
By Robert Soman July p 92

Providing a Positive Stop for a Welder Table
By J. C. Kittle July p 84

Rotary Air Motors
By Keith A. Carlson Sept. p 83

Single Cylinder Controls Vise Jaws
By John R. Stottlemyer Nov. p 114

Special Machine Cuts Screen Using Air Powered Motions Apr. p 94

8 Ways to Use Air and Oil . . . to Improve Production
By Thomas Baxter Sept. p 94

PRESS INSTALLATIONS

Adding 6000 psi Drive . . . Increases Plate Stretcher Capacity
By W. R. Matthews Aug. p 90

Air Booster Pump Gives Small High Force Package Mar. p 124

Air Controls Oil Circuit on a 2000 Ton Press
By S. H. Durbin July p 67

An All-Air Press Safety Circuit July p 80

Boosting Central System Capacity
By Nicholas P. Wakeen July p 74

Cylinder Powered Toggle Provides 500-ton Squeeze
By Les Ehman July p 82

Extrusion Press Design Uses Reciprocating Plunger Pumps
By Joseph R. Dyer July p 77

Fluid Motors Synchronize Cylinders with Unusual Loading
By John Perkon July p 102

Fluid Power for Bending
By F. J. Lammers July p 70

High Pressure Water Hydraulics
By R. K. Grobholz Mar. p 107

Pneumatic Detent Controls Expander
By Robert Soman July p 92

Pump Compensation at Two Pressures Protects Molding Dies
By A. W. Jacobs July p 89

Simple Prefill System for Hydraulic Presses
By J. R. Fawcett Apr. p 85

Standard Boosters Speed Press Construction Mar. p 82

Timed Decompression on a 600-Ton Bender
By John Cullen and M. McAlpine Nov. p 121

Timers Speed Cycle of High Speed Die Caster
By S. R. Jaffe Nov. p 76

SERVO SYSTEMS

Control of Nuclear Reactor Rods . . . with an Integral Hydraulic Servo
By A. Richter Sept. p 91

Determining Pump and Accumulator Size for Electro-Hydraulic Servomechanisms
By Paul E. Straight Apr. p 74

Electro-Hydraulic Oscillator for Driving Radar Scanner
By Theodore J. Mapes June p 72

Hydraulic Position Control with Follow-Up Valve Actuation
By George Koren Apr. p 68

Hydraulic Position Servos . . . Design and Application
By Conrad R. Himmler Oct. p 94

Hydraulic Stabilizing System . . . Gives Smooth Sailing in Rough Seas
By R. N. Cronemeyer Sept. p 129

Machine Tool Tracer Control Made from Standard Four-Way Valves
By Paul B. Walton and William F. Morgan Apr. p 108

Remote Servo Control of a 4-Way Valve . . . through Flexible Cable
By E. L. Elliott and Bill Morris Sept. p 126

Servo Controlled Aircraft Elevators On the Navy's Large Carriers
By C. M. Mullis and L. R. Rissler Feb. p 57

Servo Valve Control for Tracing on a Spar Mill
By Alexander D. Roubloff Nov. p 87

SYSTEM PLUMBING

Aircraft Hose . . . Cure Date and Age Control Sept. p 150

Aircraft Hose Development for High Pressure and Temperatures
By Irving D. Press Nov. p 132

Selection of Flareless Fittings for Aircraft Circuits
By Kenneth Clarke May p 158

Installing Fluid Power Lines
May p 87

Pipe Thread Leakage Controlled by Mismatched Threads May p 116

Port Seals . . . What's Available . . . What They Can Do May p 90

Resistance Welded Hydraulic Tubing
May p 98

Temperature Control in Hydraulic Systems
By Allan E Morris Aug. p 68

Use of Manifolds Reduces Potential Leakage Points May p 94

Welding Coupling Design . . . Eliminates Risk of Weld Scale Damage
By Gilbert A. Gaum
Aug. p 102

What to Check When Specifying Hydraulic Tubing
By Louis F. Calzi May p 134

TEST EQUIPMENT

Design of Test Equipment for High Temperature Operation
By L. H. Smith April. p 118

Accumulator Test Procedures
Sept. p 114

Hydraulics Simulates Bridge Loading
By John Giliberto and Robert K. Hedrick Nov. p 81

In-Plant Components Testing Adds Reliability to Hydraulic Operation
By A. J. Phillips Mar. p 98

Measuring Vibration in Fluid Power Circuits
By Harley L. Kressin Apr. p 86

Testing Packings on a Plant-Built Machine May p 86

Trouble-Shooting Mobile Equipment Hydraulics with a Portable Circuit Analyzer
By John S. Schroeder
Oct. p 121

AUTHOR INDEX

Ashley, E.
Series Synchronizing Circuit to Extend A Rocket Launching Beam
July p 106

Asp, Howard
How Teflon Packings Behave Where Temperatures Vary May p 127

Backofen, Ryan
Built-In Simplicity and Protection with 2000 psi Control Valves
Feb. p 81

Bandy, Kenneth and Paul McCreary
Safety with Manual Controls
Mar. p 76

Bangs, Scholer
Vertijet Uses Hydraulically Actuated Landing Field Oct. p 133

Bartlett, Brad and Ernest L. Kaiser
Counterbalancing Circuit . . . for an Overhung Milling Cutter
Aug. p 87

Baxter, Thomas
8 Ways to Use Air and Oil . . . to Improve Production Sept. p 94

Beardsley, O. G.
Manual Control of Compound Cylinder Regulates Speed and Force Nov. p 84

Becker, T. J.
Decelerating an Index Table without Shock June p 69

Bendror, Jack
Modified Valves and Cylinders Permit Use of Hydraulics to Bind Books Oct. p 82

Beshouri, Maurice

NEW!

Atkomatic stainless steel SOLENOID VALVE

controls high pressures! resists corrosion!

- **Rated to 6000 psi**
- **Explosion-proof housing optional**
- **Pipe sizes ⅛, ¼, ⅜, ½″**
- **Bubble-tight**

Atkomatic's new stainless steel barstock, 2-way solenoid valve gives you instant, dependable control of high pressure corrosive and explosive gases and fluids. Direct-lift, angle-type construction operates from 500° to minus 200° F.
